

**4th Annual International
Conference on the Contemporary
Management of Prostate Cancer**

**SATURDAY, APRIL 13th
New York Academy of Medicine
New York, NY
9:00AM-4:00PM**

MENS HEALTH MATTERS!

250,000 men develop prostate cancer each year. It is the most common cancer in America and remains the number two cancer killer in men, second only to lung cancer. Fortunately, with early detection and recent advances in treatment, most men are cured of this disease and maintain an excellent quality of life.

Physicians at the New York Centers for Prostate Care, Eastside Radiation Oncology, and Tribeca Radiation Oncology in conjunction with leading Urologists, developed this conference to answer frequently asked questions about the detection, diagnosis, and treatment of men with prostate cancer.

An expert international faculty has been assembled to discuss the newest advances in treatment for both local and systemic disease.

We have arranged for Primary Care Physicians to sit with their Urologist and Radiation Oncologist colleagues during the conference.

A CONFERENCE FOR ALL PRIMARY CARE PROVIDERS AND CANCER SPECIALISTS

BY AN INTERNATIONAL PANEL OF UROLOGISTS AND RADIATION ONCOLOGISTS

** This activity has been planned and implemented in accordance with the Essential Areas and policies of the Accreditation Council for Continuing Medical Education through the joint sponsorship of Postgraduate Institute for Medicine and First Radiation Oncology Group. The Postgraduate Institute for Medicine is accredited by the ACCME to provide continuing medical education for physicians.*
